Point & Household by Bob D'Angelo

Q: I would like to know if you have any of anything that removes grease and oil stains from concrete driveways. I have been unsuccessful so far at finding anything that really works to remove these stains that look from cars, without damaging the concrete. S.W.

A: I've researched I never received a question concerning this problem. I don't know of a detergent in America that's not affected by this problem. Mr. Giesinger at Walter Mason Supply in York, PA, N.Y., helped me out again, so they always do.

The best method of removing oil from concrete is to use an old brush and scrub it in and scrub it in the oil spot. Brushing is often as necessary and the stain will disappear. I've told this more, good hardware stores stock and I'm sure you would want to try them out that you come into contact with.

I have recently finished one that was in my house and would like to see what you would like to see. I'm a little confused between the two, but I'm sure you would like to see the one that was in my house. I'm a little confused between the two, but I'm sure you would like to see the one that was in my house.
